Pricing – 500g Glass \$8.50 - 1kg Glass \$15.00

## The Beekeepers Inn Label

### **BROWN BOX (500g only – Glass Jar)**

Brown Box is a eucalyptus tree that is found in the wheat belt of New South Wales where the summers are hot and rainfall low. The honey is amber in colour with a pleasant flavour. It naturally candies after some time. This honey was produced in the Dubbo area.

### **COOLABAH (500g only – Glass Jar minimal stock)**

A small “boxy” eucalypt, found in arid and semi arid regions. The Coolabah can provide heavy flow with good honey over a short period from Mid December to late January. The honey is light in colour with excellent density and flavour.

### **LUCERNE (500g & 1kg Glass Jars)**

Lucerne (Alfalfa) is grown for hay or in some areas pasture. Lucerne has a purplish flower and choice honey, light in colour with a mild flavour.

This honey candies naturally and quickly.

### **YELLOW BURR (500g only - Glass Jar)**

(St Barnaby's Thistle) Yellow burr is common in the wheat belt on the tablelands and slopes. Flowering occurs from mid December until the frost arrives. An excellent pollen producers, with very light honey with a greenish tint, and granulates easily.

### **BRITTLE JACK (500G only – Glass Jar)**

The Brittle Jack tree is a eucalyptus tree found in the Central West of New South Wales. The tree prefers poorer soils and grows mainly on undulating country, is drought resistant and can handle frost and light snow. This tree is unreliable in producing honey but when it does its yields are quite high. The honey is amber (a bit on the dark side) with a strong pleasant flavour. Our present Brittle Jack honey was produced in the Orange area.

### **YELLOW MALLEE (500g & 1Kg Glass Jars)**

(Eucalyptus incrassate) Flowers from August to April, producing cream-white-yellow blossoms, producing a dense and sticky honey that tastes like a buttery caramel.

### **KURRAJONG (500g & 1Kg Glass Jars minimal stock)**

(*Brachychiton*) Small to medium summer flowering tree growing to a height of 5-10m or more. Grown naturally in all parts of NSW, and are most common on hillsides. Not a major source of nectar, however does produce a medium amber honey, mild in flavour with a twist. Very pleasant honey that would suit most honey lovers.

### **GREEN MALLEE (1kg Glass Jars only)**

The Green Mallee tree is a eucalypt tree found on the western plains of New South Wales and flowers every two to three years. The tree in a good flowering season produces high yields of honey.

The honey is light in colour, of good density and has a mild pleasant flavour. Our present Mallee honey was produced near Parkes.

### **YELLOW BOX (500g only Glass Jars)**

Produced around the Cargo Cudal area 40km West of Orange. Light in colour and a mild, but bold eucalypt honey. *Regarded as Australia's best honey.*
